August 26, 2026

DAF FY27 Priorities

- **Restore Foundational Readiness**: Rebuild readiness after years of constrained funding & operational strain.
- **Maximize Operational Readiness**: Increase the readiness and availability of aircraft fleets.
- **Accelerate Next-Generation Air Combat Modernization**: Build a more lethal and survivable force for contested environments.
- **Revitalize Infrastructure**: Modernize the installations required to support future missions.
- **Reform Acquisition and Industry Engagement**: Deliver capability faster and more efficiently.

Source: *DAF leaders outline readiness, modernization priorities in FY27 budget testimony*

Dr. Troy Meink (SecAF)

Modernize Legacy Systems!

Microsoft Power Platform

No code, low code, and code first—all are welcome

Power Apps

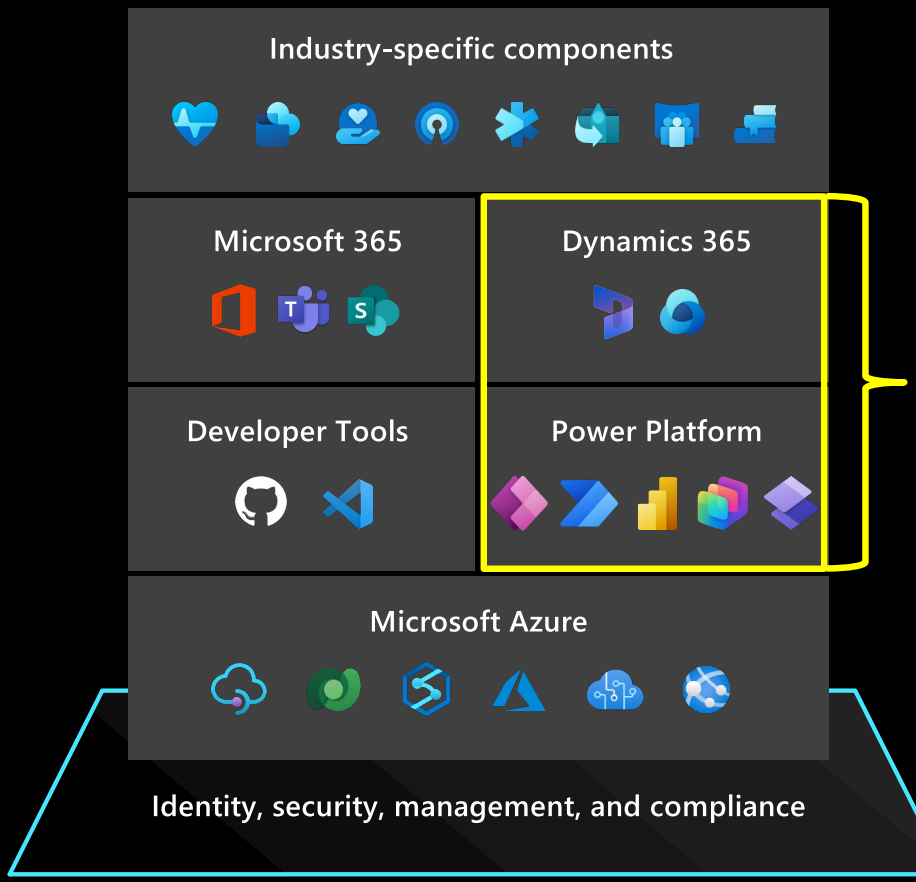
Power Automate

Power BI

Copilot Studio

Power Pages

One Microsoft Ecosystem



Transform legacy apps and streamline manual processes!

Microsoft’s Power Platform

The world’s most complete set of integrated, low-code development tools spanning Office 365 (O365), Azure, Dynamics 365 (D365), and standalone applications

Power Apps

for
web and mobile
application
development

Power Automate

for
process
or workflow
automation

Copilot Studio

for
chatbots and
conversational
agents

Power Pages

for
secure,
data-centric
business websites

Power BI

for
data exploration,
analytics and
reporting

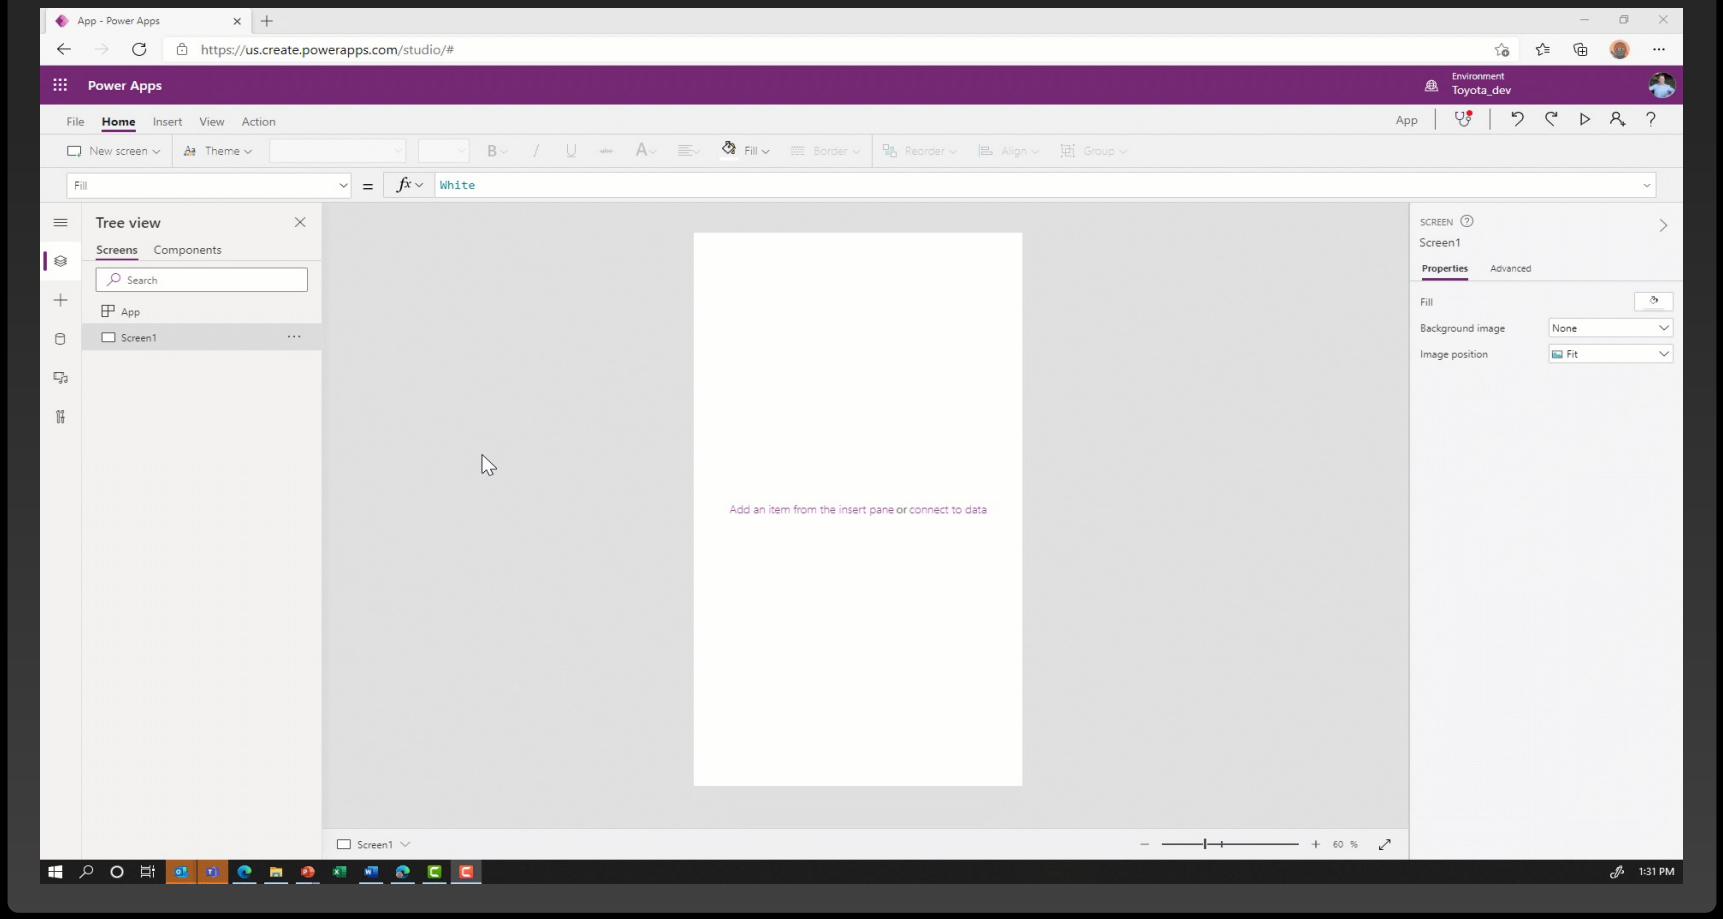
Data Connectors

Microsoft Dataverse

AI Builder

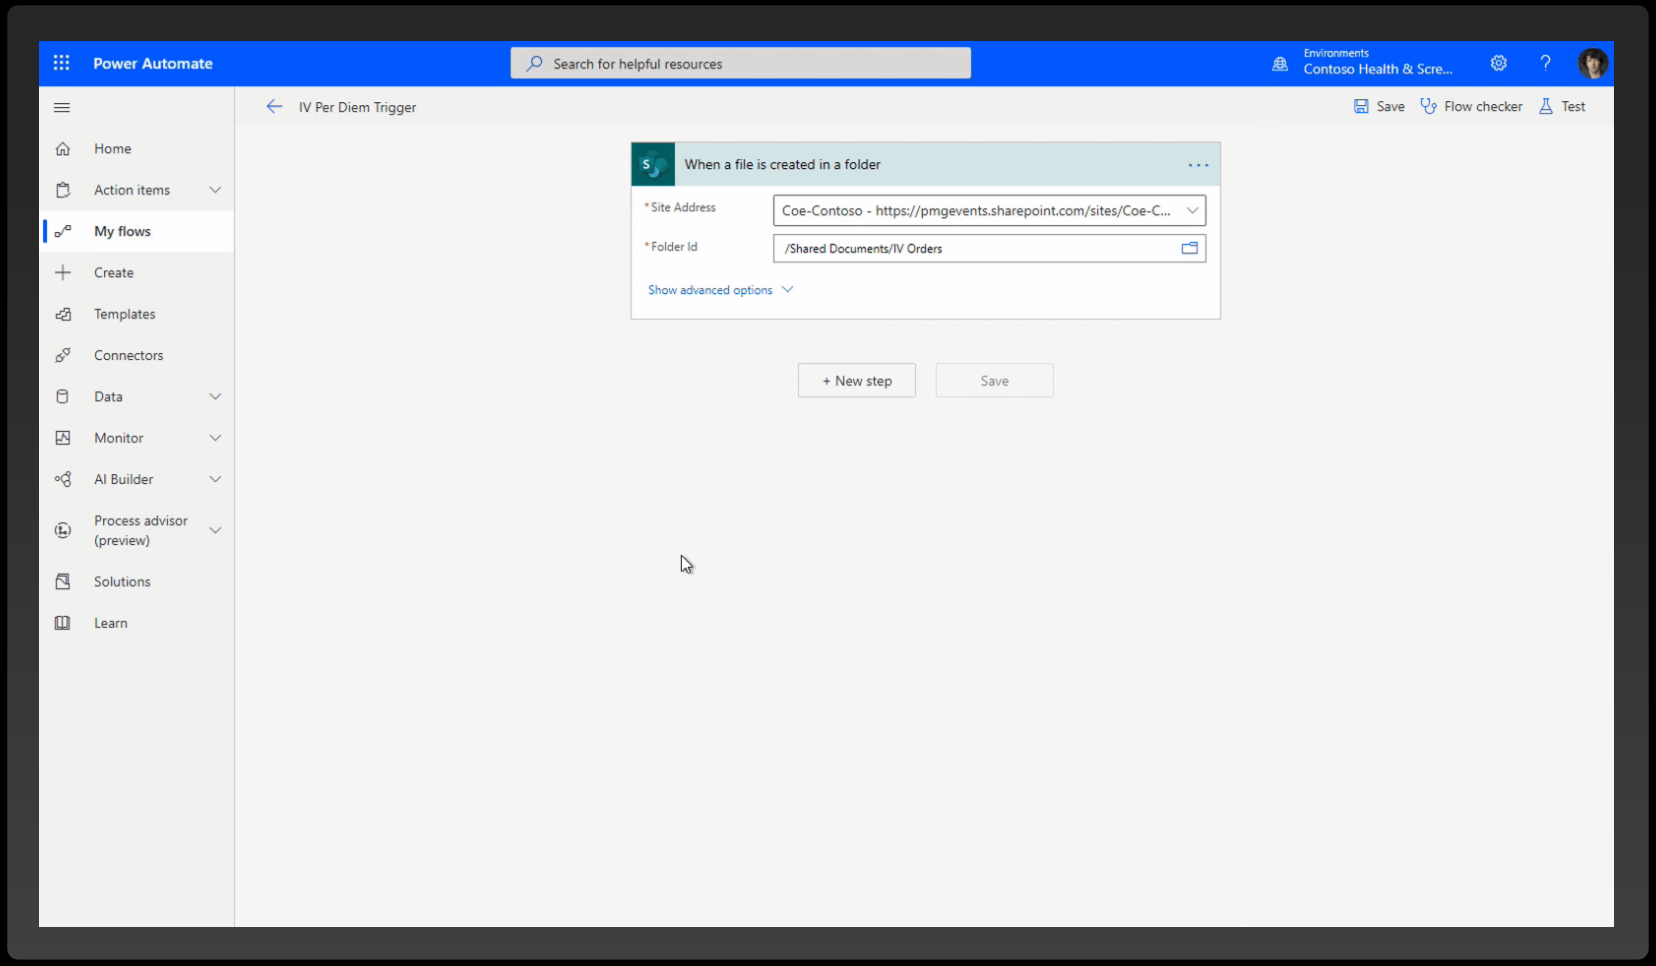
Power Apps

A low-code approach to building mobile and browser-based apps

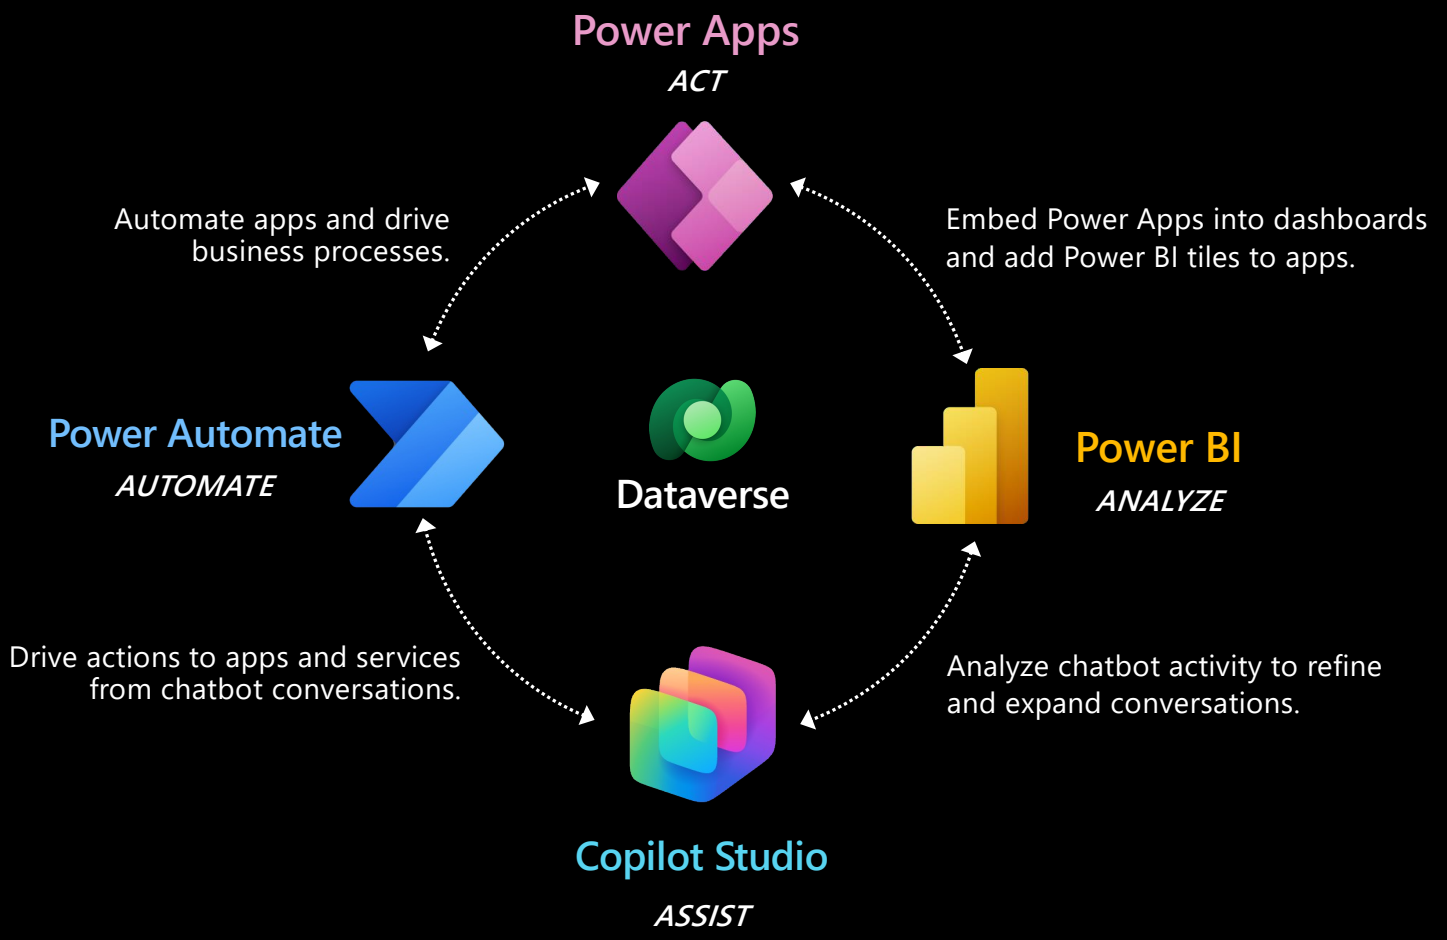


Power Automate

A low-code approach to enabling digital and robotic process automation



Powerful alone. Even better together.



DAF: Invest once & deploy multiple applications

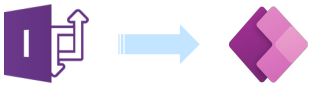
A0 – Chief of Staff	A1 – Manpower, Personnel	A2 – Intelligence, ISR	A3 - Operations	A4 - Logistics
• Commander's dashboard • Command calendar • Congressional inquiries • Distinguished visitors • Timesheets • Checklists • Daily strength/accountability • Force readiness • Gift tracker	• In-processing/out-processing • Workforce management • Medical readiness • Psychological readiness (well-being) • Joint manning • TDY requests/approvals • Request for forces • Awards/decorations • Training/certifications	• Asset tracking • Requirements/intelligence gathering • Geospatial cataloguing • Special access program requests • Sensitive item tracking • Continued suitability checks • Foreign travel requests/approvals • Security incident tracking	• Facilities management • Fleet management • Adaptive planning • Operational response • OPORD/FRAGO • Theater security cooperation • Passports/visas • Personnel tempo (PERSTEMPO) • Mission planning	• Asset lifecycle management • Facilities management • Request for assistance/mission assignment (HA/DR) • Military sales • Arms room • Government vehicle management • Service animals • Basis of issue plans
A5 – Plans & Policy	**A6 – IT**	**A7 – Training**	**A8 – Plans & Programs**	**A9 – Studies, Analyses, Assessments**
• Engagement scorecard • OPLAN/CONPLAN development, staffing, publishing	• Portfolio management • Requirements management • RFI/RFP solicitations • Vendor tracking • Help Desk ticketing/support • Access requests • Service account creation • User provisioning	• Readiness • Training management • Lead generation • Vehicle qualification • Aircraft qualification • Weapons qualification • Class management • Military recruiting	• Contracts • Budgeting (POM) • Auditing • Contractor management • Strength management • Credit card charge validation	• Investigation management (IG) • Project tracking • Liaison management • Publishing • Interagency "rolodex"

What Can Power Platform Do For You?

Quick Wins

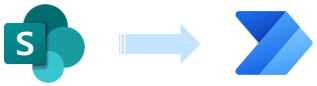
Access => Power Platform/Dataverse

Anyone using legacy Access on-prem databases today has a quick/easy way to migrate them to a true relational database in the cloud (Dataverse), opening the door to seamless integration with Power Apps, Power Automate, etc. across the DAF.



InfoPath Forms => Power Apps

Power Apps is the successor to InfoPath Forms (now deprecated), and we can help migrate/re-purpose them today.



SharePoint Workflows => Power Automate

DAF users can and should migrate SharePoint 2010/2013 workflows to Power Automate for all their workflow requirements.

Azure + Power Platform Integration

The Power Platform helps pro developers enhance app productivity and complete work requests more efficiently. They can then focus on more complex capabilities such as building Azure + Security services => API Management, Functions, Kubernetes, Azure Cognitive Services, Sentinel, Defender, etc.

Enterprise Solutions

SAP + Power Platform Integration

There is a broad set of functionality in the Power Platform that will make it easier for organizations running SAP to digitally transform and automate their business processes.

ServiceNow + Power Platform Integration

This directly supports EITaaS, where the ITSM solution today is ServiceNow (SNOW). The Power Platform can surround the SNOW architecture and help fill/plug any capability gaps where needed.

Oracle + Power Platform Integration

COMING SOON: There is a broad set of functionality in the Power Platform that will make it easier for DAF personnel using Oracle ERP/FM solutions (i.e. DEAMS) to digitally transform and automate business processes.

Air Force Soars with Digital Transformation: Power Platform Suite Revolutionizes Operations

The implementation of the Power Platform suite has led to significant cost savings, time reduction, and improved efficiency across various functional categories. In 5 days, we received over 80 Success Stories from around the Air and Space Forces which were collected, analyzed, and categorized.

- **1,000+ hours saved annually** by automating manual reporting processes
- Connected data sets to provide MAJCOM/COCOM/FIELDCOM/Base/Individual **900+ customized reports**
- Workload reduction of **2,6000+ hours** through automation of foreign Key Leader Engagements (KLEs) tracking
- **Reduction in RFIs** across Secretariat, Air, and Space Staffs
- **Improved productivity** through real-time data access, allowing efficient and informed decision making
- **Increased job satisfaction and innovation** for Airmen and Guardians

DoD Telework Agreement App (based on DD Form 2946)

Air Force Material Command (AFMC) 413 Flight Test Squadron (FLTS)

DoD TELEWORK AGREEMENT (413 FLTS 2946 per DD Form 2946, DEC 2011)

PRIVACY ACT STATEMENT

AUTHORITY: 10 U.S.C 113, Secretary of Defense; DoD Instruction 1035.01, Telework Policy.
PRINCIPAL PURPOSE(S): Information is collected to register individuals as participants in the DoD alternative workplace program; to manage and document the duties of participants; and to fund, evaluate and report on program activity. The records may be used by Information Technology offices to determine equipment needs, to ensure appropriate safeguards are in place to protect government information and for assessing and managing technological risks and vulnerabilities.
ROUTINE USE(S): None.
DISCLOSURE: Voluntary; however, failure to provide the requested information may result in your inability to be a participant in the program.

TERMS OF TELEWORK AGREEMENT

The terms of this agreement must be read in conjunction with DoD telework policy, available on the DoD Issuance Web Site at https://dtic.mil/whs/directives/ or on the Civilian Personnel Management Service Web Site at https://www.dcpas.osd.mil/ and any additional guidance provided by the employing organization. Signatories certify they will abide by this agreement, DoD telework policy, and all supplemental terms established by the employing organization.

1. Work schedules and hours of duty may be modified as necessary, but are subject to local management procedures and approval and/or collective bargaining agreement requirements. A copy of the employee's approved work schedule should be kept on file with the signed telework agreement. In emergency situations (as indicated in Section I, Block 12 of the telework agreement), the teleworker's work hours may be subject to change. Emergency schedules will be set based on mission needs.

2. If the employee reports to the regular worksite at least twice per pay period, the regular worksite is the official worksite as defined in part 531.605, subpart F, Code of Federal Regulations.

3. If the employee does not report to the regular worksite at least twice each biweekly pay period, the official worksite is the location of the employee's telework site. Exceptions to the twice each biweekly pay period requirement may be made during emergencies (including a pandemic) and for short-term situations (e.g., special projects, medical accommodation).

4. All pay (to include locality pay or local market supplement), leave, and travel entitlements are based on the employee's official worksite as documented on a Notice of Personnel Action.

5. Prior to signing this Telework Agreement, the supervisor and employee will discuss: a. Office procedures (e.g., procedures for reporting to duty, procedures for measuring and reviewing work, time and attendance, procedures for maintaining office communications); b. Safety, technology and equipment requirements; and c. Performance expectations.

6. Employee will not work in excess of the prescheduled tour of duty (e.g., overtime, holiday work, or Sunday work) unless he or she receives permission from the supervisor. By signing this form, the employee acknowledges that failure to obtain proper approval for overtime work may result in cancellation of the telework agreement and may also include appropriate disciplinary action.

7. If designated employee (as indicated in Section I, Block 12 of this agreement) is unable to work due to illness or dependent care responsibilities, the employee must take appropriate leave. Supervisors may, on a case-by-case basis, administratively excuse the designated teleworker from teleworking if circumstances, such as a power failure or weather related emergency, prevent the employee from working at the telework site. To the extent practicable, managers will include a description of emergency duties with this agreement if emergency duties are different from the employee's prescribed duties and responsibilities.

8. Teleworkers may be required to return to the regular worksite on scheduled telework days based on operational requirements. In situations where the employee is called to return to the office outside normal work hours, the recall shall be handled in accordance with established policy and/or collective bargaining agreements, if applicable.

9. If the employee uses Government-furnished equipment (GFE), the employee will use and protect the equipment in accordance with the DoD Component's procedures. GFE will be serviced and maintained by the Government.

DEPARTMENT OF DEFENSE TELEWORK AGREEMENT

1. EMPLOYEE	**2. OFFICIAL JOB TITLE**
WILSON OCAMPO	Power App Developer
3. PAY PLAN/SERIES/GRADE/PAY BAND	**4. ORGANIZATION**
Contractor (Fake Data)	413 FLTS
5. REGULAR OFFICIAL WORKSITE	**6. ALTERNATE WORKSITE ADDRESS**
Hurlburt Field	1111 Stone Road, FWB, FL
7. ALTERNATE WORKSITE TELEPHONE #	**8. ALTERNATE WORKSITE EMAIL ADDRESS**
555-555	test@mail.com

9. TELEWORK ARRANGEMENT DATES		**10. TOUR OF DUTY**
11/14/2022	11/13/2024	Compressed

11. TELEWORK ARRANGEMENT	Regular/Recurring

# Days a Week or Pay Period	**Week or Pay Period**	**Days of the Week**
2	Week	Thurs/Friday

12. CONTINUITY OF OPERATIONS DURING EMERGENCY SITUATIONS

Employee is expected to telework for the duration of an emergency pursuant to: 1) Component policy; 2) a pandemic; 3) when the regular worksite is closed or closed to the public due to natural or manmade emergency situations (e.g., snowstorm, hurricane, act of terrorism, etc.); or 4) when Government offices are open with the option for unscheduled telework when weather conditions make commuting hazardous, or similar circumstances compromise employee safety. Employees unable to work due to personal situations (e.g., illness or dependent care responsibilities), must take appropriate leave (e.g., annual or sick). If the worksite is closed or closed to the public, the employee may be granted administrative leave, on a case-by-case basis, when other circumstances (e.g., power failure) prevent the employee from working at the telework site. Managers will include a description of emergency duties with this agreement if emergency

Pass & Registration

Base Visitor Request System (BVRS)

for unescorted access to Wright-Patterson AFB

ALEXANDER SCHWARTZ
alexander.schwartz.3@us.af.mil

Please read before submitting a visitor request

Information required to submit a visitor Pass Request

1. Visitor's first and last name exactly as it appears on their driver's license
2. Visitor's driver's license or state ID number and state of issuance OR visitor's US passport number
3. Areas Visitor must access (Area A, Area B, Base wide)
4. Days and times Visitors require access.

Please ensure:

1. Your Visitor has a current, valid state or federally issued photo ID.
2. Your Visitor is a US citizen. For non-US citizens, contact the Foreign Disclosure Office at 937-904-2535
3. Visitors must report to Pass and Registration to pick up passes. Passes will not be emailed or delivered prior to their start date.

For informational purposes only: To gain unescorted access to a DOD installation, all individuals must establish identity, fitness, and purpose.

1. Identity: Established through valid, current federal or state photo ID.
2. Fitness: Established through a background check. An individual is typically fit if they have no outstanding warrants, terrorism connections, convictions for disqualifying offenses, or other disqualifying conditions. Visitors not meeting WPAFB IDP fitness standards will be denied.
3. Purpose: The person's acceptable reason for seeking installation access, such as a meeting, appointment, or facilities use.

Enrollment: All visitor passes are processed and printed using the Defense Biometric Identification System (DBIDS). DBIDS is a Department of Defense (DoD) approved Physical Access Control system used on WPAFB that assists the entry controller. All persons requiring access to WPAFB will register in DBIDS. Enrollment requires visitor to provide their social security number as well as biometrics (photo and fingerprints). All personally identifiable information is protected pursuant to the Privacy Act of 1974 as well as DOD/USAF privacy programs. Visitor's refusing to enroll will not receive unescorted WPAFB access.

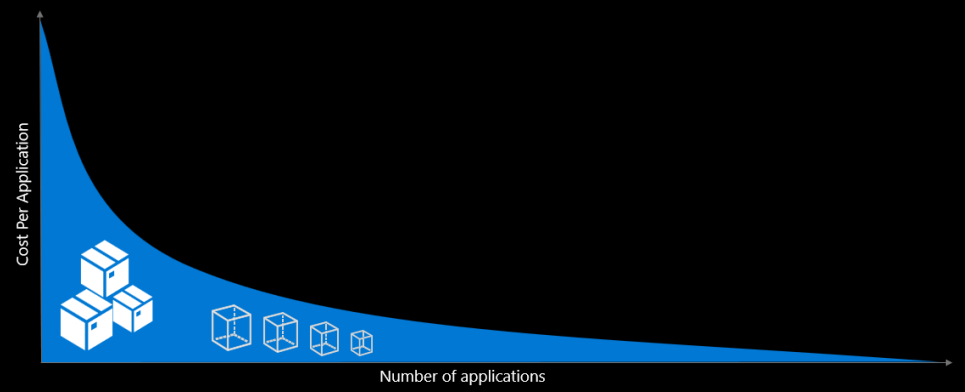
Why Power Platform?

Deliver Projects Faster

- Projects that historically may take years to complete commonly finish in months
- Months-long projects reduce to weeks and weeks turn into days

Drive Cost per Solution Near Zero



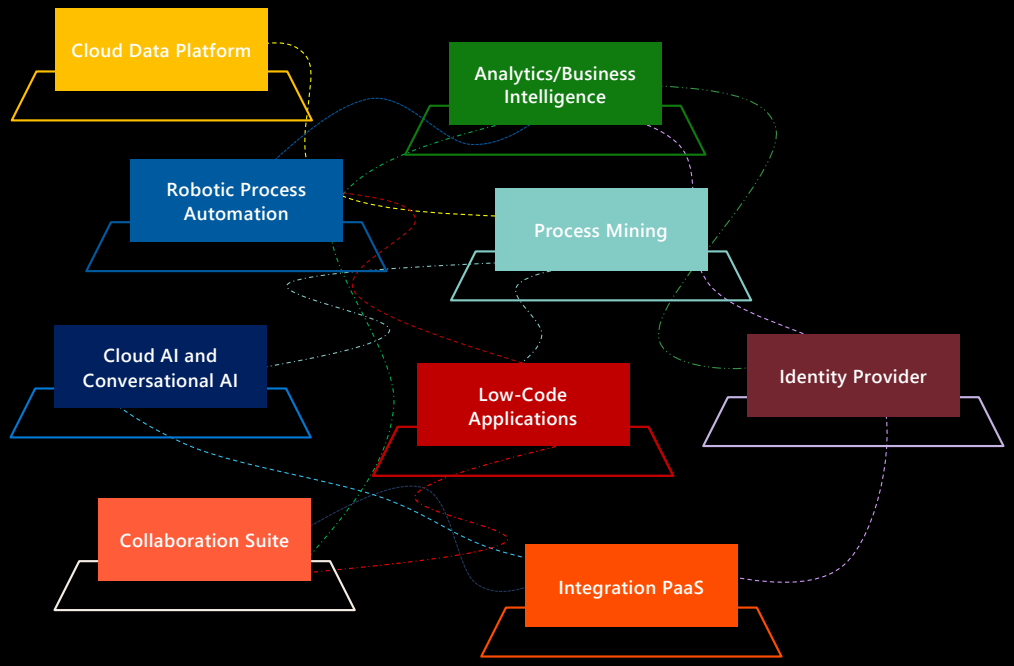
- Each application you build on the platform costs less
- This is an incentive to build and deploy applications on the platform more quickly – the faster you go, the more you benefit
- Drives cost out, drives risk out, drives employee experience up

~~"How do we build one app faster?"~~
"How do we transform 10,000 processes a year?"

Point solutions solve for a specific number of known things

A platform solves for an infinite number of unknown things

Traditional approach to low-code – point solutions



The Microsoft approach – an integrated platform
