Microsoft Graph

Automatically connects your data, people, and workflows across M365, enabling agents that are personal to your team and organization

What sets Microsoft 365 Copilot apart?

1

5-in-1 AI-first productivity app

Brings together Chat, Search, Agents, Notebooks and Create into a unified AI experience for work.

2

Integrated in the tools that millions use every day

Copilot is available in Teams and Microsoft 365 apps. With this integrated approach, Copilot understands your work context. Data governance and compliance ensure that security policies stay intact.

3

Advanced reasoning agents

Researcher, Analyst and custom agents utilize deep reasoning tailored for specific tasks that act as virtual employees.

4

Agent platform

Everything you need to design and develop a trusted ecosystem of agents with consistent UI, standardized controls and scalable Agent Store.

5

Copilot Control System

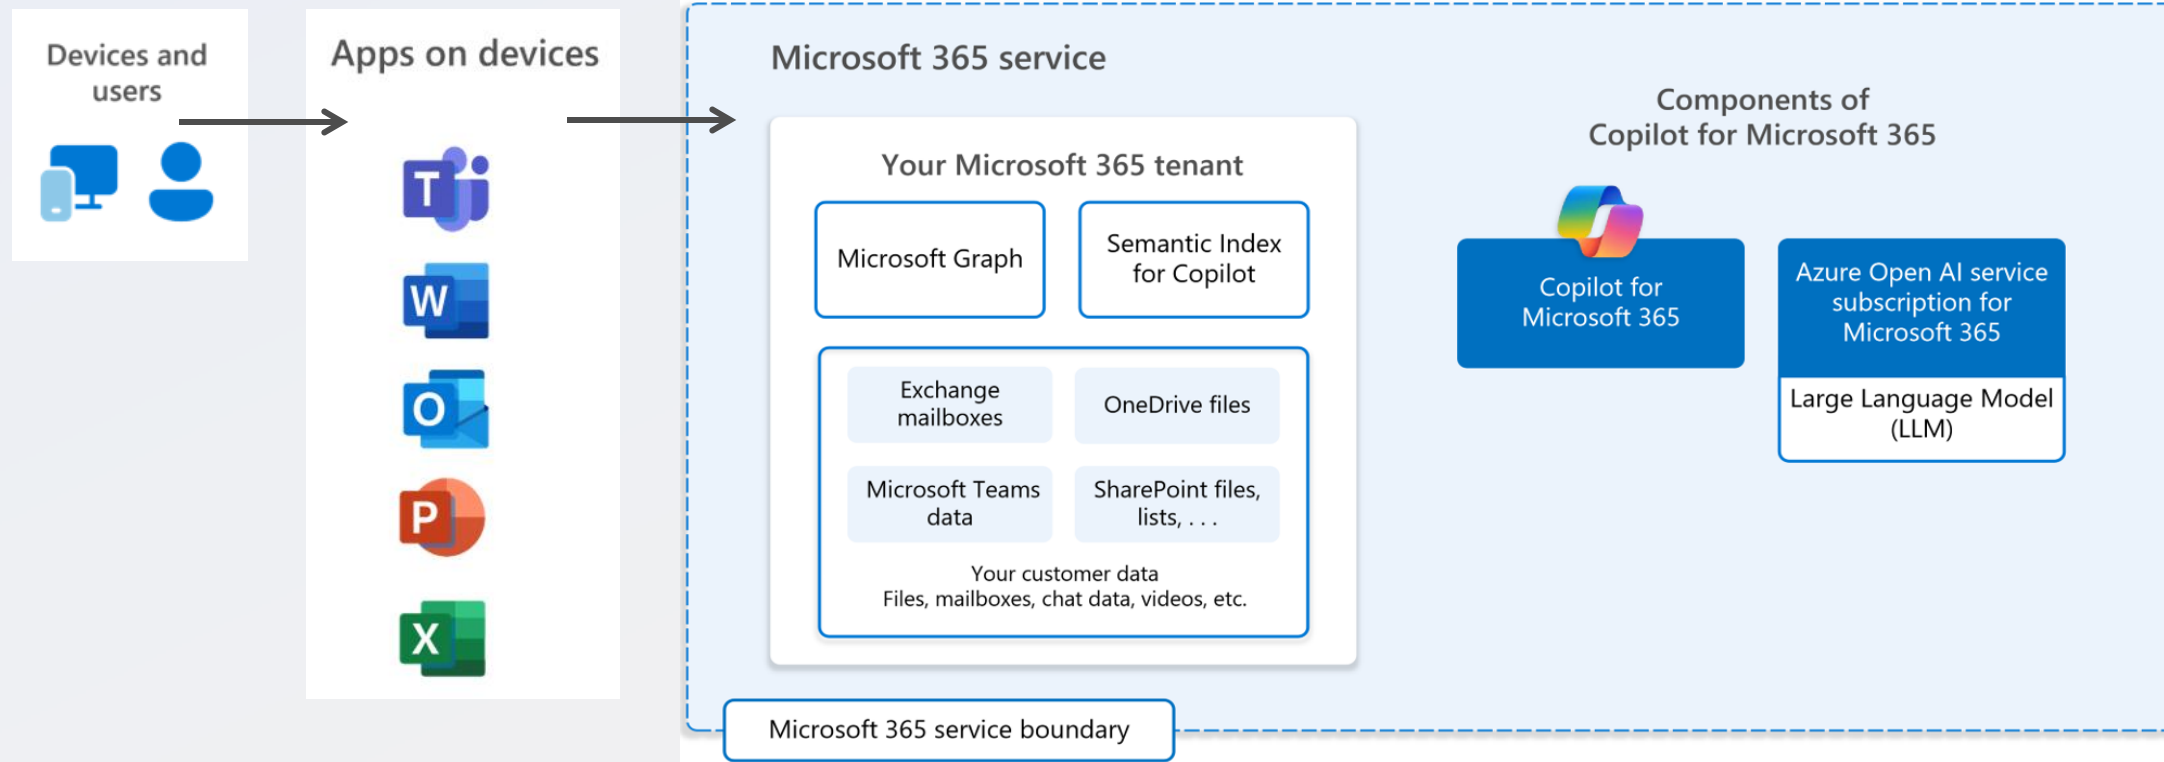

Robust security, management, measurement and reporting to understand business impact of Copilot and Agents along with standardized governance and controls.

6

Flexible deployment options

Enables organizations to scale AI and meet the unique needs of specific roles and functions.

Microsoft Copilot for M365 service and tenant logical architecture

Your customer data stays within the Microsoft 365 service boundary. Your prompts, responses, and data in the Microsoft Graph is not used to train foundation LLMs that Copilot leverages. Your data is secured based on existing security, compliance, and privacy policies already deployed by your organization.

Your tenant sits inside the Microsoft 365 service boundary, where Microsoft's commitment to security, compliance, data location, and privacy are upheld.

Copilot is a shared service just like many other services in Microsoft 365. Communication between your tenant and Copilot components is encrypted.

Mission-Aligned Copilot Possibilities

x0

Chief of Staff

- Have Copilot summarize a staff meeting, listing action items for each Commander
- Ask Copilot to build a Daily Strength Report that summarizes data from multiple spreadsheets

x1

Personnel

- Tell Copilot to author an award recommendation using text from email and chats
- Have Copilot Identify units deficient in Medical Readiness and author an email to Commanders

x2

Intelligence

Request Copilot summarize assets
CLASSIFIED
Summarize authorization
course programs for a particular theater

x3

Operations

- Ask Copilot to provide insights and learnings from previous mission planning documents
- Use Copilot to draft an OPORD based upon summary emails and documents

x4

Logistics

- Request that Copilot summarize expiring assets based upon a spreadsheet
- Have copilot summarize trends in humanitarian assistance programs for a particular theater

x5

Planning & Policy

- Have Copilot summarize legislative bills, analyze impact, provide concise briefs for decision makers
- Task Copilot to assess environmental impact of infrastructure plans for compliance, sustainability and mitigation measures

x6

Information Technology

- Use Copilot to review RFI submissions to determine submission compatibility with lists of requirements
- Have copilot build incident response playbooks based upon documentation and previous incident outbriefs

x7

Training & Recruitment

- Ask Copilot to analyze skills requirements for various roles & help identify training needs and skill development plans
- Use Copilot to generate e-learning modules and draft policy briefs related to DOD polices, compliance and regulations

x8

Finance / Programs

- Have Copilot draft an RFP based upon lists of requirements
- Request that Copilot generate a budget prioritization list based upon data within emails and documents

x9

Civil Affairs

- Tell Copilot to draft CMIC project proposals, communication strategies and coordination plans
- Use Copilot to draft plans for post-conflict stabilization & reconstruction, prioritizing projects, resource allocation and community engagement
