

Making BIG work smaller

What We Do

- Automation using
SharePoint, Power Automate, and
UiPath
- Maximizing the impact of PAQ interns
- Building an Agile Future Workforce
- Educate the Workforce

Training

- Two Power Platform Courses from Learning Tree
- Microsoft Certified: Power Platform Fundamentals: PL-900
- UiPath Roadshow provided by PEO BES
- Scrum Master Certification
- Microsoft Azure Training

Digital Air Base Wing

Transforming 78 ABW into the AF Model for Mission Partner & Community Integration

The Digital ABW campaign is a transformative initiative to not only allow a more universal "work from anywhere" paradigm, it will increase ABW effectiveness supporting mission and community partners by reducing process time and costs and increasing perceived quality of service.

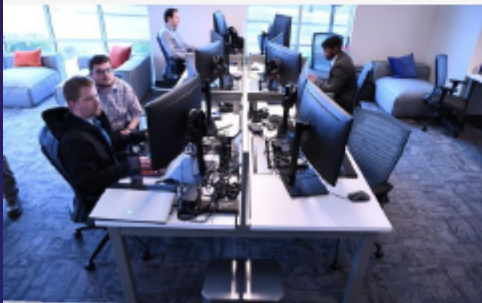

ABW Lines Of Effort

LOE 1: Visual/Virtual Presence

- Conference Room Standardization/Modernization
- Mobile Connectivity
- Virtual Management for long term telework

LOE 2: Workplace Environment

- Converting cube farms to hoteling
- Swappable office space
- Collaboration spaces
- ✓ SC Collab Prototype

LOE 3: Digital Content/Processes

- Robotic Process Automation
 - ✓ C-17 AoP Gate Charts
- Virtualization of Processes
 - ✓ Virtual out-processing checklist
 - ✓ Virtual visitor control center
 - ⇒ Remote software updates
- Virtual Meetings & Tools
 - ✓ 78 ABW Hiring Wall Walk via Tableau (Data Analytics)

LOE 4: Digital Tools/Training

- Transformation to "digital" wingman
- "Accessible from anywhere" digital platforms
- Educated base populace on Digital Platform
 - ✓ CVR Campaign
 - ✓ MS Teams
 - ⇒ MS Planner
- Resource libraries with links to training

LOE 5: Virtual Training

- Virtual Reality Technology
 - ✓ Enduvo Contract
- Interaction with high demand/low density equipment
- Creation of 3D training modules

LOE 6: Unified Communication

- Integration of Voice/Data/Video
 - ⇒ Softphone VoIP

LOE 7: ABW CyberSystems Oversight

- Cyber Systems Oversight/Guidance
 - ⇒ Mission Defense Team (MDT)
 - ⇒ Wing Cyber Office (WCO)
- IT Risk & Portfolio Management

LOE 8: Community Partnerships

- ✓ Robins North
- Smart Base Community Assessment
- STEM Outreach
- Project Synergy Innovation Center
- Mercer "Blue Sky" Software Lab
- MGSU Software Innovation Center
- Advanced Technology & Training Center

Automation Is Driving the Digital Transformation

Our Team

Juanson J. Pitt

Branch Chief, CoA Champion, Scrum Master

Candace D. Wilder

SharePoint Program Manager, CoA Project Manager,
Scrum Master

- Thomas Smith: ITSM Remedy Program Manager, UiPath PM, Scrum Master
- Raymond Osburn: SharePoint and Power Automate Developer
- Tim Larsen: SharePoint Developer
- Stanley Green: Power Automate and Power Apps Developer
- Shavius Alford: PAQ Intern, UiPath and Power Automate Developer, ISSO, Scrum Master
- Nia Foy: PAQ Intern, UiPath and Power Automate Developer, Scrum Master
- Kyle Williams: PAQ Intern, UiPath Developer
- Kassidy Gibbs: PAQ Intern, Power Automate Developer, Scrum Master
- Brandon Newman: PAQ Intern, .Net Developer

the **STORY** *of* **WORK**

A black and white line drawing of two small, stylized human figures standing on a horizontal platform. They are holding up a large, bold, blocky letter 'W' which is part of the word 'WORK'. The word 'STORY' is written in a similar bold, blocky font to the left of the 'of' and 'WORK'. The word 'the' is written in a cursive script to the left of 'STORY'. The entire title is centered on a white background, which is framed by thick black horizontal bars at the top and bottom.

Intro to Automation/RPA

- RPA makes it easy to build, deploy, and manage software robots that emulate human actions
- Interact with digital systems and software
- Perform a wide range of defined actions (faster and more consistently than humans)

- Can produce a level of productivity that makes employees invaluable
- Assisted bots can oversee repetitive, rule-based items
- Humans can invest more time in critical, thought-provoking, and transformative tasking

Human and Robot

This is the true value of RPA: it creates a partnership in which the robot and the human are focused each on the tasks that they are best at. See below.

Robots

The Robot gets the tedious tasks: data collection, data entry, storing files. It is 100% focused on these tasks and makes no errors.

Humans

The Human keeps the high-value activities for himself: face-to-face interactions with colleagues or coming up with complex strategies. He can be 100% dedicated to the things that make him irreplaceable.

Which tasks does the human user assign to the Robot?

Which tasks does the human keep for himself?

Some of the Tasks That Can Be Easily Handed Over to Robots:

Log in to any application

**Connect to
system APIs**

**Move files
and folders**

**Extract content from documents,
PDFs, emails and forms**

**Read and write
to databases**

**Open emails
and attachments**

**Scrape data from
the web**

Make calculations

RPA Tools Used at Robins AFB

UiPath

Can interface with any web application or site.
Has licensing cost per user.

Power Automate

No cost, Little to No Coding involved.
Interface with applications and systems is limited to
the connectors that are available.

UiPath Studio encapsulates both simple and complex solutions for application integration and automating third-party applications, administrative IT tasks, and business IT processes.

Studio is at the heart of automation with UiPath products. Activities form into comprehensive workflows in Studio, which are then executed by the Robot.

Studio comes with two types of profiles for developers and business users:

- **StudioX** enables business users with little or no coding experience to automate their tasks.
- **Studio** offers a plethora of tools for designing complex attended, unattended, and testing automations.

Unattended vs. Attended

Unattended

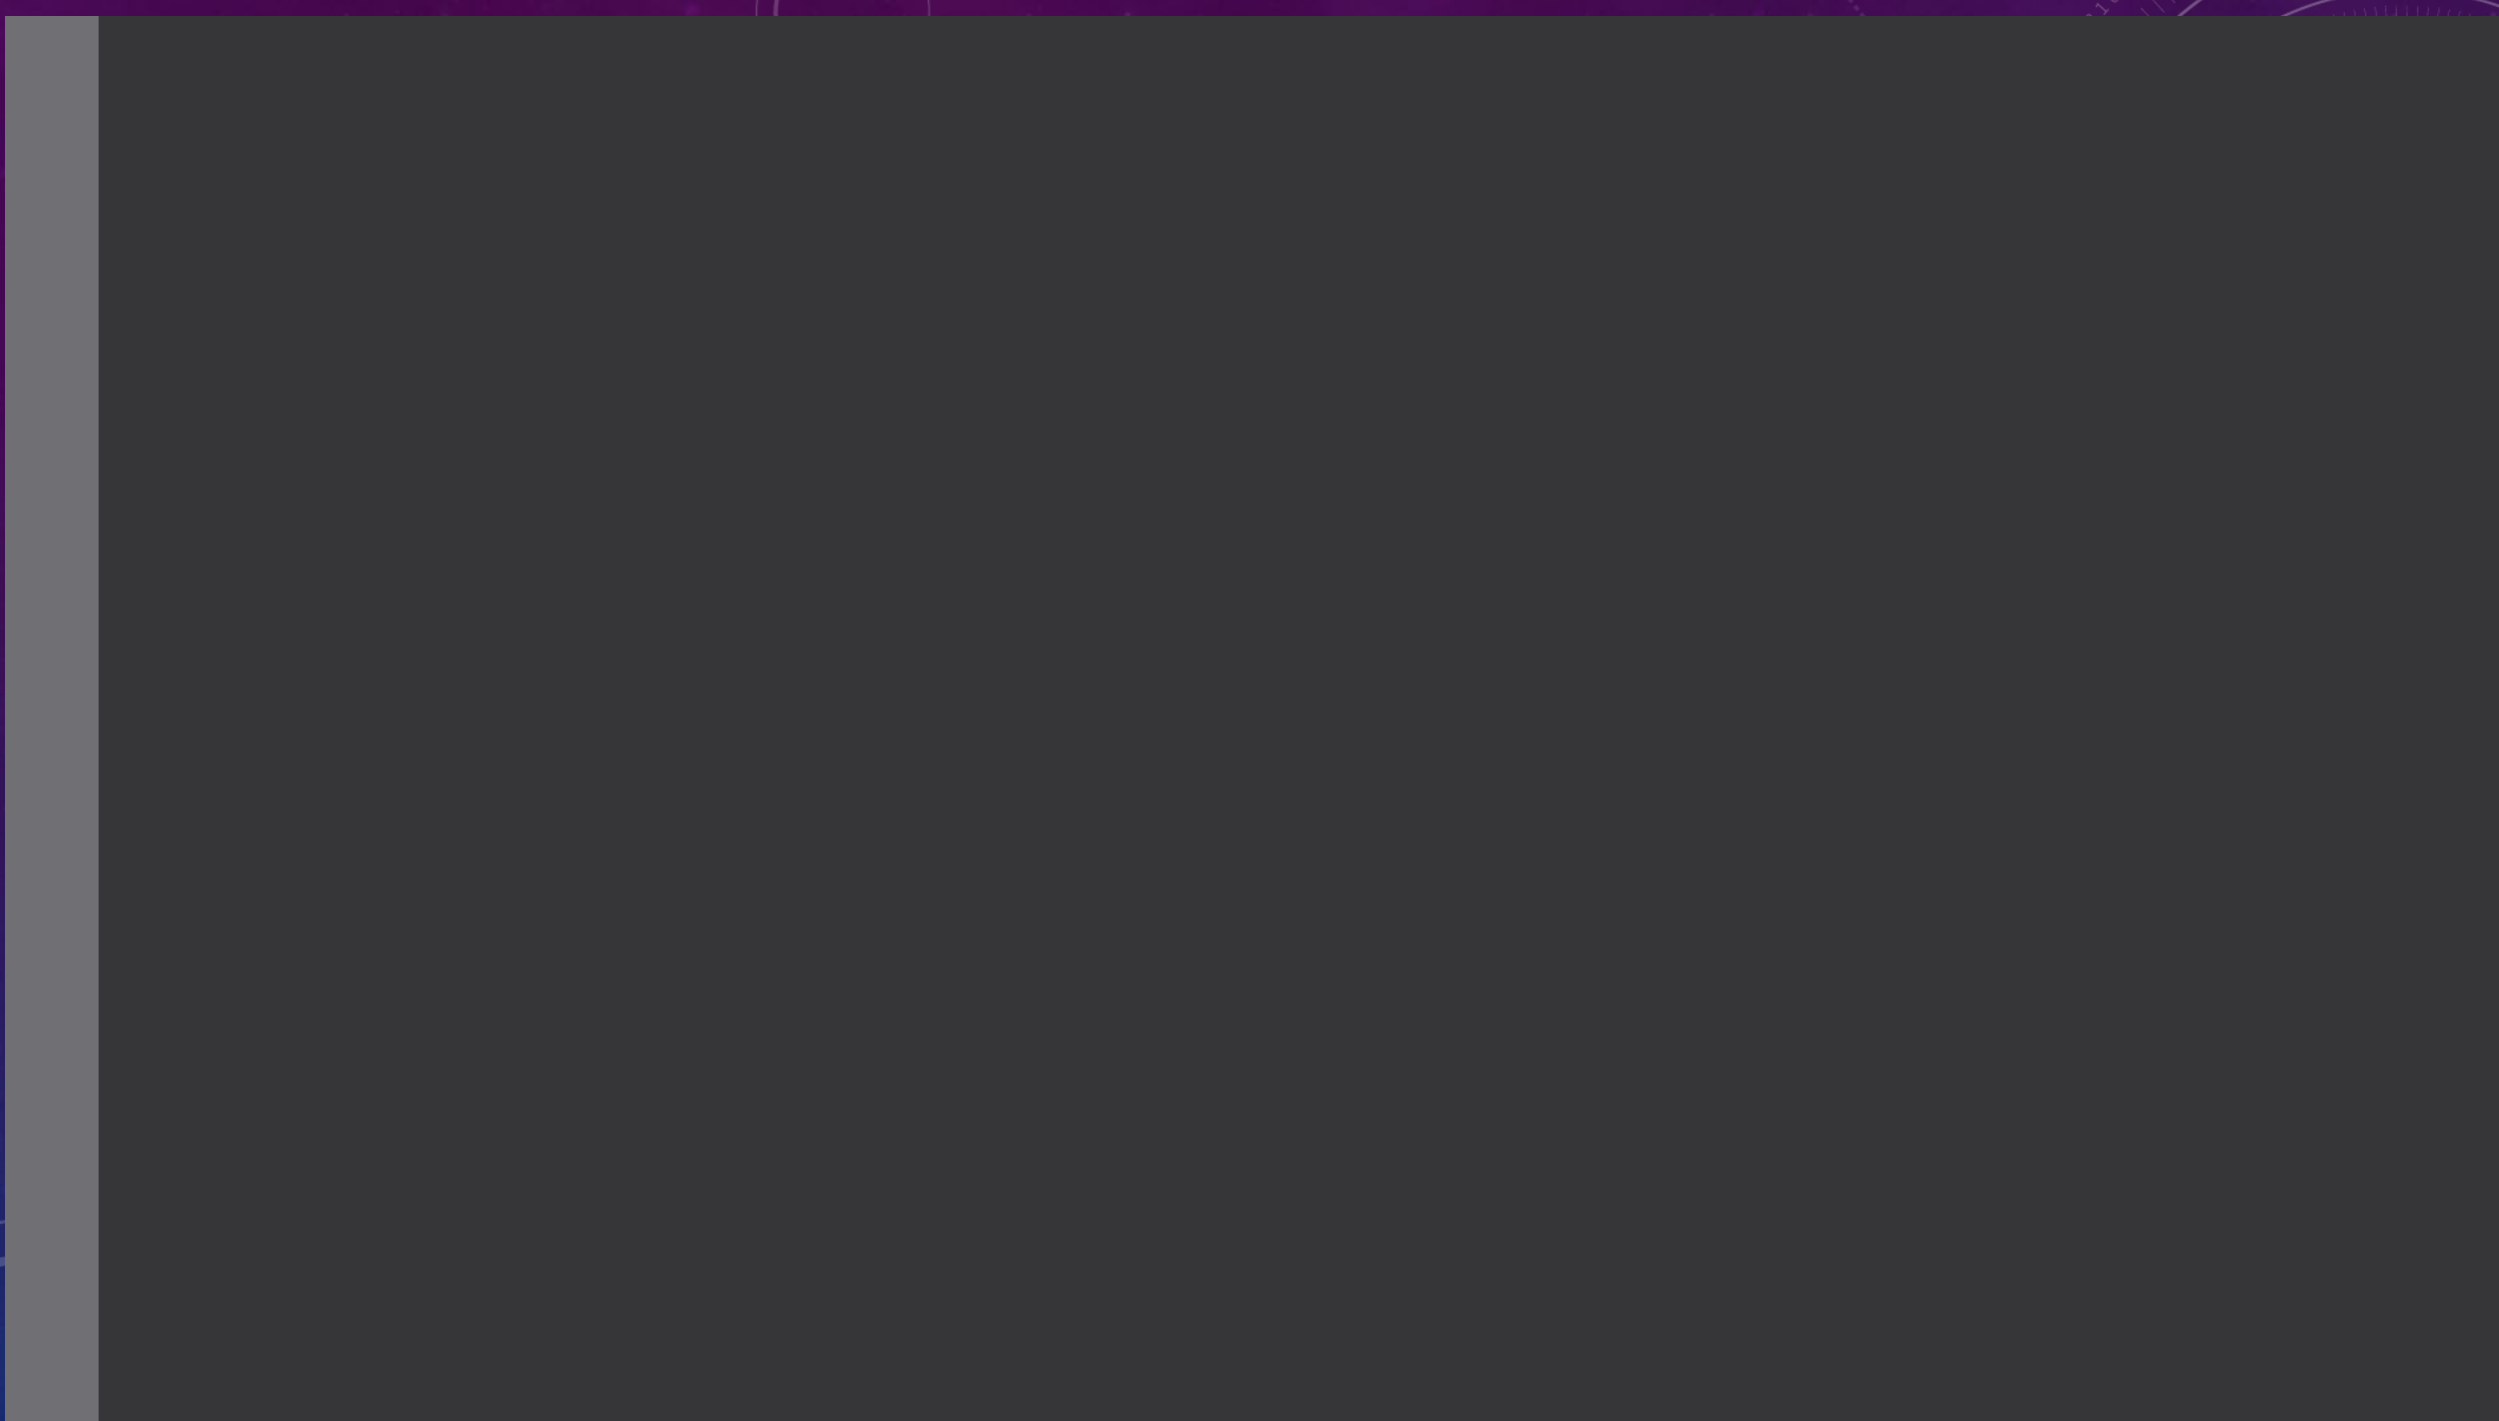

- For running long process or automations without human interaction.
- Do not depend on users to trigger processes; they are controlled through UiPath Orchestrator.
- Can run on any machine connected to Orchestrator.

Attended

- For small and repetitive tasks.
- Triggered by user or specific user events.
- Are run on user's machine.

Robins Connect App Calendar BOT

- **Developer:** Nia Foy, 78 ABW/SCXO
- **Customer:** Col. Duarte, 78 ABW Vice Commander
- **Process:** Previously, 78th ABW personnel were manually inputting events in both SharePoint and the Robins Connect App. This bot removed the need to input the events in the app. The bot is run every day to update the app with any changes made from the events listed in the SharePoint site. Users only need to input/modify an event in SharePoint and it is automatically updated within the app.
- **Details:** Created a bot that pulls events from SharePoint and converts them into a Microsoft Excel Spreadsheet file. The events are then loaded into a Google calendar which syncs with the app calendar.

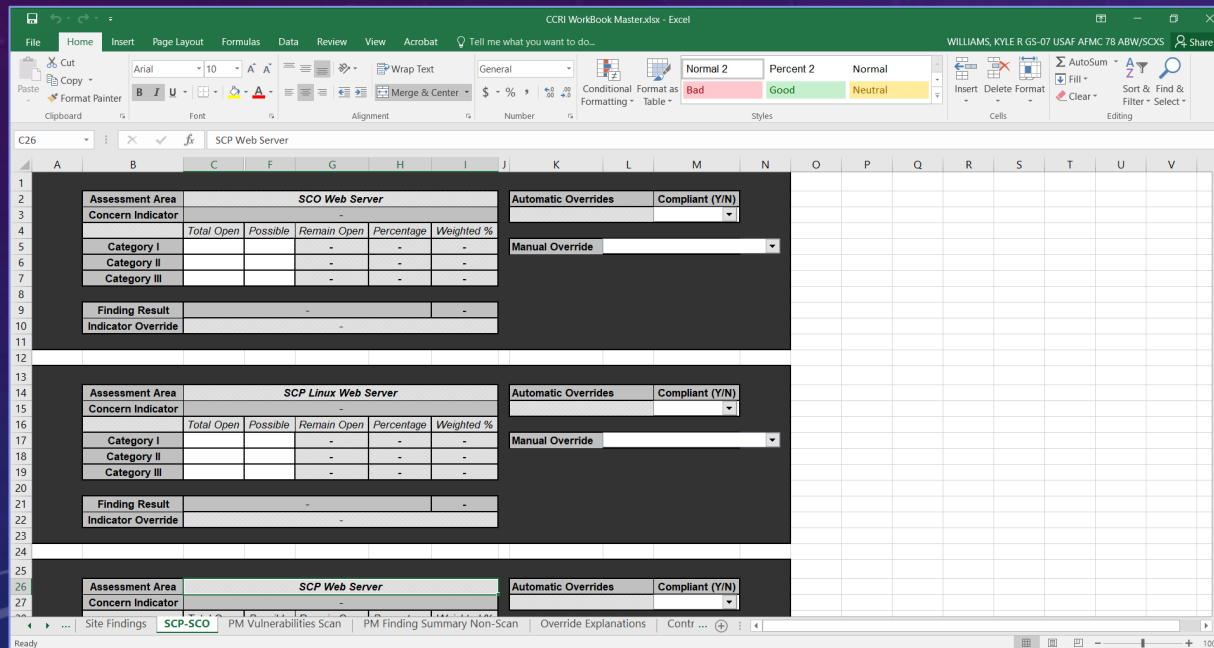

Command Cyber Readiness Inspection (CCRI) Bot

- **Developer:** Kyle Williams, 78 ABW/SCXS
- **What is CCRI?**
 - Command Cyber Readiness Inspection (CCRI)
 - Tests the Base's readiness of a cyber and physical threat
 - Conducted every three years
 - Robins AFB has monthly CCRI meetings to prepare
- **The bot actually consist of two separate bots:**
 - Numbers Bot: Conducts 72 Commands in under 2 Minutes
 - Slide Bot: Combines 22 Slides in under 15 seconds

WHY WAS THE BOT CREATED?

➤ TURN 6 HOURS OF WORK TO 30 MINUTES

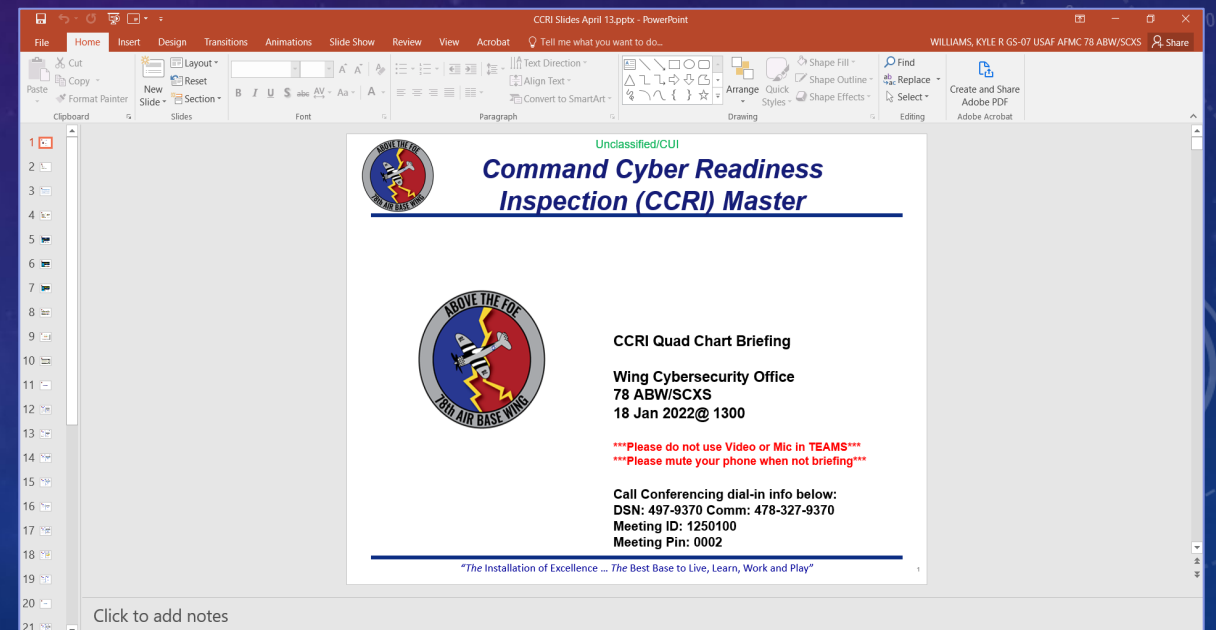

- Gather Branch Numbers For CCRI Grading Sheet
- Create CCRI Monthly Slides

- Robust low-code RPA tool
- Empowers employees to improve their efficiency
- A solution that everyone can use to automate everything from simple data transfers to complex business workflows
- Straightforward drag-and-drop interface
- Tools to record keyboard and mouse actions
- Intuitive, effortless experience for every user and many tasks

Included in our DAF365 suite of tools so there is no extra licensing costs!

- Automate business processes
- Streamline repetitive tasks and paperless processes
- Send automatic reminders for past due tasks
- Move business data between systems on a schedule
- Connect to almost 300 data sources or any publicly available API
- You can even automate tasks on your local computer like computing data in Excel

BACKGROUND:

- SharePoint Out of the Box Workflows were previously used for document or list item routing and approval
- Workflows were decommissioned
- 52 Workflows were rebuilt using Power Automate

Power Automate does MUCH more than the old SharePoint Workflows did!

WHAT CAN BE BUILT?

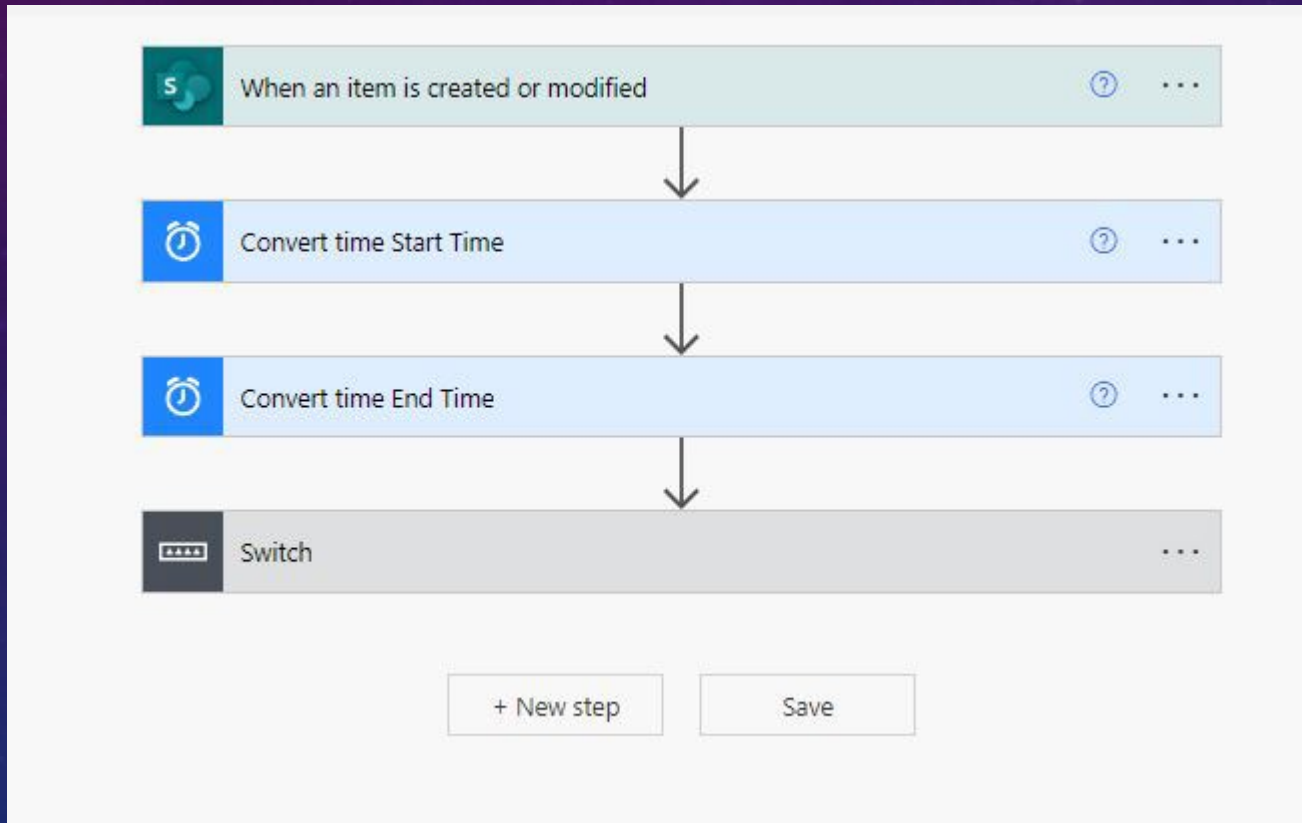

- Calendar solutions
 - Conference room reservations
 - Leave requests
- In/out processing
- Document approval flows
- Event Registration
- And Much More!

Conference Room Reservations

SharePoint Calendar App list utilized with Power Automate to create automated emails for event approvals and/or rejections. Emails are sent to users for confirmation of event being reviewed, as well as the approval/rejection of event. Automated emails are also sent to the SharePoint Approver Group assigned to the calendar, advising them that the event needs to be reviewed.

The screenshot shows a configuration window for a Microsoft Power Automate trigger. The window has a title bar with the Power Automate icon, the text "When an item is created or modified", a help icon, and a close icon. Below the title bar, there are two required fields: "* Site Address" with the value "https://usaf.dps.mil/sites/21618/" and "* List Name" with the value "B210 Small Conference Room (RM 300)". Each field has a clear (X) button. At the bottom, there is a link "Show advanced options" with a downward arrow.

```

Leave Request Calendar

Uses a custom list in SharePoint. Requesters submit a new item on the list and this triggers a Flow. An email is sent to the supervisor for review. If denied, an e-mail is sent to the requestor. If approved, an E-mail is sent to the requestor and an event is added to the Leave Request Calendar. If the creator needs to cancel a request they change the Canceled field value to Yes. This triggers a Flow to notify the supervisor of the change and remove the Leave Request Calendar item identified by the list item that was changed.

Attn Site Owners,

On July 29, 2022, the AFMC STINFO Office will begin a search of SharePoint sites to ensure that the appropriate controls are in place. Please review the documents at this link and use them as a reference to assist you in checking the access to your STINFO documents on SharePoint:

https://usaf.dps.mil/teams/RobinsSP/STINFO_Documents/Forms/AllItems.aspx

Access should only be to persons or groups that fall under the documents' specific Distribution Statement. Also, follow the Monitoring Guide to check for any documents that might need their access control changed.

The best way to search for these documents is to type 'Distribution Statement B' into the search box at the top right of your site's home page. Then repeat that search for C through F. When you find a result that has the statement, click on "View library". Then check the permissions for that particular document to ensure that only those people that need access to it have permissions. Adjust permissions accordingly or delete the document if it is no longer needed.

Going forward, make sure to add this STINFO check to your monthly content reviews and notate on the Content Review list in your site accordingly.

Let me know if you have any questions.

VR,

Event Registration Site

- Custom Built Web Part Solution
- Created by AFGSC/DSK at Barksdale AFB
- Allows users to register for events with one click of the mouse
- Sends reminder emails to registered users
- Eliminated Motorcycle Safety Web App
- No longer need a dedicated DBA, PM, developer support, Product Owner, or certification
- Currently have about four other event registration sites in use across the Base

Robins AFB Motorcycle Safety Course Registration

Register for a course using the instructions below. When done, click the link at the bottom of this page to continue to the next step of registration.

Find a Course

Type the title or date of a course into Search to find a particular course. Click the View icon to the left of Title to read more details about a course. If no courses appear below, refresh the page.

Register for a Course

Click the blue icon with the '+' to register for a course. You will receive an email confirming your registration. Add the course to your Outlook calendar by clicking the blue icon with the arrow. To unregister, click the red icon with the '-'. If a course is full, add yourself to its waitlist by clicking the blue icon with the person and the '+'. Click the red icon with the person and the 'x' to remove yourself from the waitlist.
